Equipment Description

The StealthLite Rechargeable Luminaire is a hand-held torch powered by four off 'AA' size Nickel-Cadmium cells enclosed as a battery pack with Pelican catalogue number 2459. The enclosure is constructed from ABS and the lens from polycarbonate with an ABS shroud. The battery pack is mounted within a main enclosure with the combined lamp/reflector module. The moulded lens screws over the main enclosure to effect a seal for the equipment with the seal relying upon two 'O'-rings. The lamp module, Pelican catalogue number 2454, is a 4.8 V, 0.5 A single filament lamp. A diode on the anode charging connection prevents a potential difference occurring at the charging contacts on the outside of the enclosure.

Conditions of Certification:

None

This certificate may only be used in its entirety and without change

ATEX Conformity Certificate Schedule

Epsilon Certificate Number:

Epsilon 02ATEX1189X

Special Conditions of Certification:

1. This product is constructed from ABS and polycarbonate and must not be used in atmospheres known to have an adverse effect on these materials.
2. The enclosure of this product is manufactured from non-conductive materials and as such may present a static risk in explosive atmospheres – clean only with a damp cloth.
3. The equipment must only be fitted with Pelican/Peli catalogue number 2459 NiCad battery pack. The battery pack must not be charged in a hazardous area. The battery pack shall only be replaced in a non-hazardous area.
4. The lamp may only be replaced with a Pelican/Peli catalogue number 2454 lamp module.

This certificate may only be used in its entirety and without change
